

1	There were snags we hadn't expected.
2	Again and again we had problems.
3	I think that cleanliness is extremely important in doing an experiment
4	Doctors were worried that the patient would die if she didn't stop bleeding.
5	Everyone could see that A had nothing to do with B.
6	It was blindingly obvious that his conclusion didn't hold water.
7	In first world countries people would not be able to live without money.
8	It turned out to be difficult to find the man-made things.
9	Lots of job losses is just one thing resulting from automation.
10	Modern technology has made our lives better.
11	Most of the crowd were drunk and shouting and quite a few were injured when the police reacted violently.
12	One particular problem became clear from the first results.
13	The way people live is definitely why we have global warming, according to scientists.
14	Personal communication got much worse when they put in a new IT system.
15	Personality tests help psychologists work out what people's problems are.
16	Researchers looked at the way strain builds up round a geological fault.
17	Scientists are trying to work out how important calcium is.
18	Something happened which we hadn't expected.
19	The common owl is active at night.
20	The drug Michael Jackson's doctor gave him made him have a cardiac arrest and die.
21	The new record-keeping programme has completely got rid of the company's inventory problems.
22	The public were able to go into the museum at certain times for free.
23	The research showed that men were taking an increasing part in housework.
24	The results told us for sure that the original calculations were right.
25	The things the government did made people quite angry.
26	The two companies combined together to form one.
27	We must do some more studies to work out the reasons why the experiment was no good.
28	There are many bad things about this policy.
29	There were several ways to work out what the results meant.
30	We can't put up with these terrible conditions.
31	We didn't have enough time to finish the tests.
32	We don't come across this problem very often.
33	We felt a lot better after getting these results.
34	We need to do more work out in the field
35	We got results that made us feel optimistic.
36	We have to keep the temperature at the same level during the whole of the experiment.
37	We hope this new drug will get rid of malaria completely.
38	We must look more closely at and give more importance to the social consequences.
39	We ran into a number of problems we couldn't solve.
40	Aborigines are not only put in jail more than white Australians; they have a worrying rate of deaths in custody.
